

On-Site/On-Demand Systems, Tags, Labels and Supplies - We are your One-Stop Source

With Source ID tags and labels, software, hardware and tech support, you can now create your own on-site/on-demand tags and labels when and as the need arises. UV and fade resistant, weatherproof, waterproof and tear resistant, our products hold up no matter what Mother Nature throws at them and are ideally suited to the horticulture industry.

Printing on-demand requires solid, hard working mid-range printers that can produce clear, consistent images that don't fade over the course of the season. We recommend the OKIData model C9650. This is a printer that we have found to meet a high standard of performance and speed and will work well with our base materials and substrates. The OKIData model C9650 with duplexer allows for two sided printing in a single pass.

Approximate list price for the **OKIData C9650 duplex.....\$ 4,250.00**
(Sold and supported by local OKIData authorized resellers, a list can be provided upon request)

To allow for the integration of the printer with a host system, or to function as a stand-alone node, you will require an easy-to-use software with lots of functionality.

We recommend Nice Label Software. This program allows for exceptional control and quality print generation on laser printers with duplexing capabilities. It provides excellent management of data flow and graphic files and will allow seamless access to your picture libraries and image archives.

Graphic templates for your Horticulture programs can be developed to your specifications and Source ID would be happy to assist you with these. As well, we can integrate this software into your present host system.

Approximate list prices for **NiceLabel** Software:
Nice Label Pro (single user).....\$ 495.00
Nice Label Suite (single user).....\$ 995.00

Note: Nice Label Suite single user would be the perfect choice for your Horticulture on-site/on-demand program.

Material and Printed Sheet Costs (based on the following recommendations):

- * Source ID's CL5 base material (5pt. coated, 2 sided polyester sheet) for high impact graphics using colored laser printers. (Provides excellent outdoor durability and UV resistance)
- * OKIData C9650 toner allows for up to a full season of fade resistance (subject to standard outdoor conditions)
- * Sheet size: 8.5" x 11" Can be 6 up or 8 up (tags per sheet) depending on what is desired. Custom sizes can be created depending on volume and demand.

Approximate cost per finished printed duplex sheet, printed 2 sides (4 colors on the front and one color back) ... **\$ 0.98 - \$1.70 per sheet**

Please note: Based on 6 tags per sheet, this works out to approximately \$0.16 to \$ 0.29 per tag, printed two sides (depending on volume and coverage)

Larger volume orders may reduce the cost of your finished tags

All prices subject to change without notice

Source ID, manufacturers with more than 45 years behind us - you are dealing direct and are guaranteed to benefit from the lowest prices and shortest delivery times for our on-site/on-demand labels and you can count on us to provide system support with certified technicians.
